

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claim 1. (currently amended) An isolated biopolymer marker consisting of amino acid residues 2-14 of SEQ ID NO:1 which evidences a link to Alzheimer's disease.

Claims 2-38. (cancelled)

Claim 39. (previously presented) A method for determining the presence of an isolated biopolymer marker consisting of amino acid residues 2-14 of SEQ ID NO:1 comprising:

- (a) obtaining a sample from a patient;
- (b) conducting mass spectrometric analysis on said sample in a manner effective to maximize analysis of peptide fragments contained therein and comparing mass spectrum profiles of said isolated biopolymer marker consisting of amino acid residues 2-14 of SEQ ID NO:1 to mass spectrum profiles of peptides obtained and analyzed from said sample; and
- (c) confirming the presence of said isolated biopolymer marker

consisting of amino acid residues 2-14 of SEQ ID NO:1 in said sample displaying a peak profile at about 1682 daltons in said mass spectrum profile;

wherein the presence of said isolated biopolymer marker consisting of amino acid residues 2-14 of SEQ ID NO:1 is indicative of a link to Alzheimer's disease.

Claim 40. (previously presented) The method of claim 39, wherein the sample is an unfractionated body fluid or a tissue sample.

Claim 41. (previously presented) The method of claim 39, wherein said sample is selected from the group consisting of blood, blood products, urine, saliva, cerebrospinal fluid, and lymph.

Claim 42. (previously presented) The method of claim 39, wherein said mass spectrometric analysis is selected from the group consisting of Surface Enhanced Laser Desorption Ionization (SELDI) mass spectrometry (MS), Maldi Qq TOF, MS/MS, TOF-TOF, ESI-Q-TOF and ION-TRAP.

Claim 43. (previously presented) The method of claim 39, wherein said patient is a human.

Claim 44. (previously presented) A kit for determining the presence of an isolated biopolymer marker consisting of amino acid residues 2-14 of SEQ ID NO:1 comprising: (a) a peptide consisting of amino acid residues 2-14 of SEQ ID NO:1, and (b) an antibody that binds to said peptide in a sample from a patient.

Claim 45. (previously presented) The kit of claim 44, wherein said antibody is immobilized on a solid support.

Claim 46. (previously presented) The kit of claim 44, wherein said antibody is labeled.
